

STORM

W W W . M A P E X D R U M S . C O M

SONIClear™ Bearing Edge

The **SONIClear™ Bearing Edge** is standard on all Storm shells and allows the drumhead to sit flatter and make better contact with the shell. The result is a stronger and deeper fundamental pitch, effortless and consistent tuning, and a significantly expanded tuning range.

Allows the head to sit flush promoting ease of tuning, increased shell resonance & optimal tonal clarity.

Causes the head to sit high resulting in tuning difficulty, poor shell resonance & lack of tonal clarity.
